Profile

Seasoned software engineer with 10+ years of expertise in backend development and DevOps, specializing in building scalable, secure, and high-performance software solutions.

Demonstrated success in modernizing legacy systems, transitioning platforms to scalable architectures, and streamlining deployment pipelines for improved efficiency. Passionate about harnessing the power of PHP to deliver innovative and reliable software tailored to business needs.

Skills

Programming Languages	PHP (advanced), Javascript/TypeScript (advanced), Java (prior experience), Go (prior experience)
Frameworks	Laravel, Symfony, Spring Boot
Databases	MySQL, PostgreSQL, MongoDB, Redis
DevOps & Cloud Tools	AWS, Docker, Grafana, GitHub CI
Other Tools	Git, Bash/ZSH, Vagrant

Experience

PHP Developer

Dublin, Ireland

MAXWEB – AD-SERVING PLATFORM

June 2024 – January 2025

- Improved our front facing platforms, implementing new features and improving existing ones.
- Worked on a deployment and continuous integration pipeline on our cloud-based infrastructure.
- Developed new functionality interfacing between legacy systems and new API based systems.

Senior Software Developer

Dublin, Ireland

EXADS – AD-SERVING PLATFORM

December 2020 – February 2024

- Led the implementation of multiple public-facing features impacting tens of thousands of active users.
- Implemented back-end architecture improvements, introducing coding standards and scalable designs.
- Directed the payments integration system, optimizing architecture and improving product delivery time.

Software Development Manager

Buenos Aires, Argentina

TIENDANUBE – ONLINE SHOPPING PLATFORM

June 2019 – November 2020

- Recruited and mentored a high-performing development team, conducting technical interviews and career development sessions.
- Oversaw day-to-day development, including code reviews, technical designs, and documentation.
- Fostered best practices across development teams, enhancing productivity and quality.

Technical Team Leader

Buenos Aires, Argentina

AFLUENTA – PEER-TO-PEER LENDING PLATFORM

May 2016 – June 2019

- Transitioned a legacy monolithic platform to a microservices architecture, improving scalability and reliability.
- Introduced Agile methodologies, enhancing cross-team collaboration and delivery.
- Implemented a CI/CD pipeline, reducing deployment outages and increasing efficiency.

Additional Experience (2011 - 2016): Senior Developer roles at Wobiz (E-Commerce Platform), FWTV (Streaming TV), and MobileHealth (EHR Platform) focusing on scalable software development and leadership in tech-driven projects.

Education

BSc in Computing

Dublin, Ireland

NATIONAL COLLEGE OF IRELAND

September 2023 – Present
